

Synapse Aviation / Airport Briefing (<https://airportbriefing.aero/>) is looking for:

Senior Angular Developer

=====

Description:

The position requires to design, build, and maintain efficient, reusable, and reliable code for a front-end CMS. The back-end is AWS cloud server-less architecture.

Requirements:

- 3+ years of technical experience
- Passion about creating simple technical solutions
- Ability to write and maintain understandable technical documentation
- Proficient in Typescript, SCSS, HTML
- Understand RsJs state management
- Understand, recognize and properly implement software design principles and patterns
- Query, manipulate and manage data storage (SQL is a must)
- Experience using AWS cloud services (Server-less: S3 and Cognito)
- Analytical, problem-solving, and decision-making skills
- Solve a wide variety of technical problems across the full tech stack and contribute daily to all parts of the code
- Take ownership of what you build

Location:

Remote or Skopje
